

CORSO APEO:

Corso di Benessere, Make-up e Inestetismi da Terapia

Ft. Fabio Sandrin

Ft. Luiz Felipe Nevola Teixeira

Problematiche post trattamento oncologico

Definizione di sequela

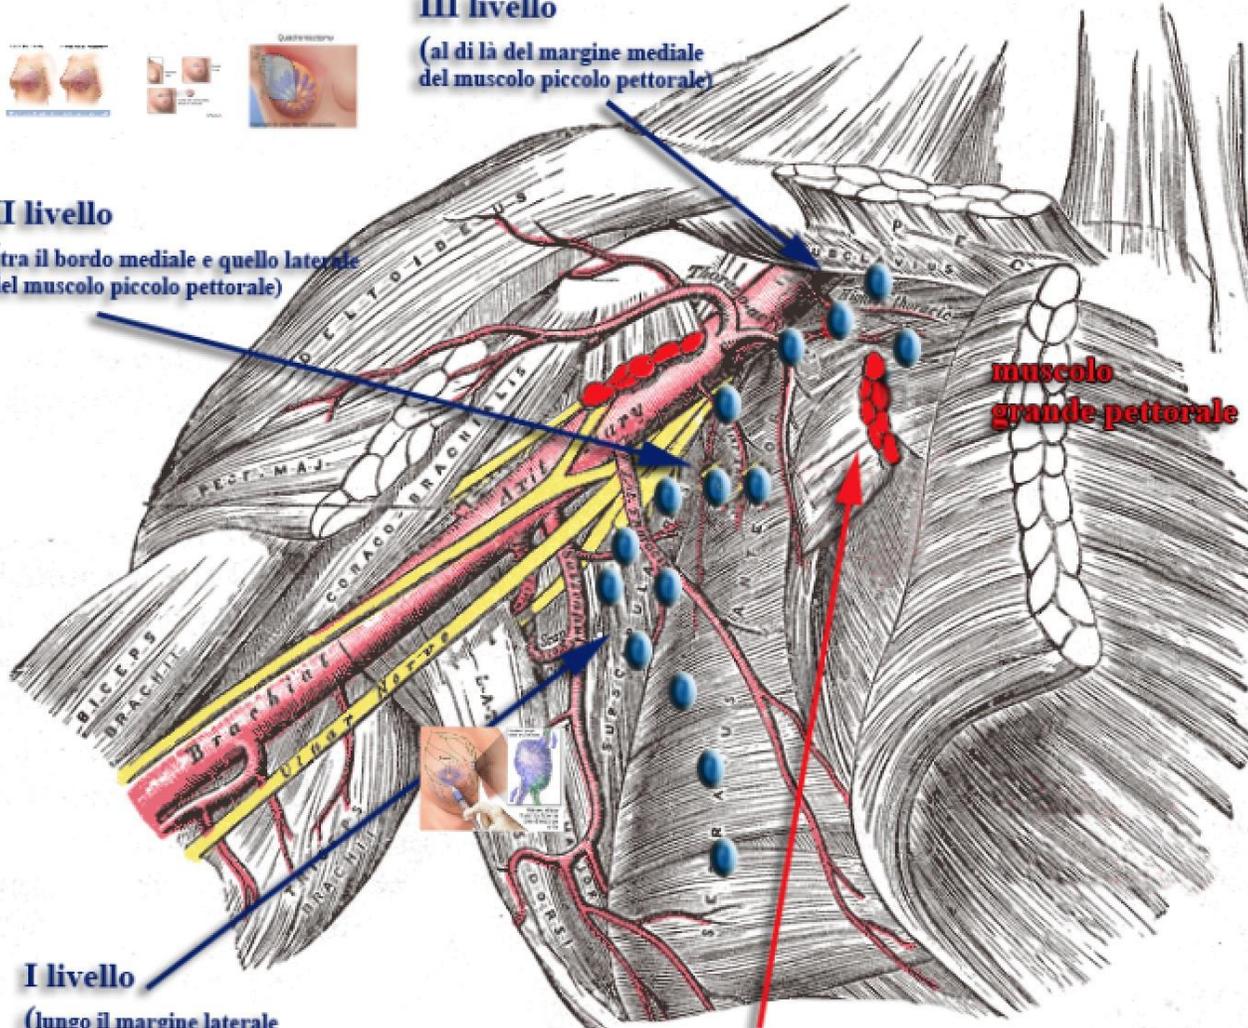

Sequela chirurgica vs sequela farmacologica

Importanza della valutazione delle sequele

III livello
(al di là del margine mediale
del muscolo piccolo pettorale)

II livello
(tra il bordo mediale e quello laterale
del muscolo piccolo pettorale)

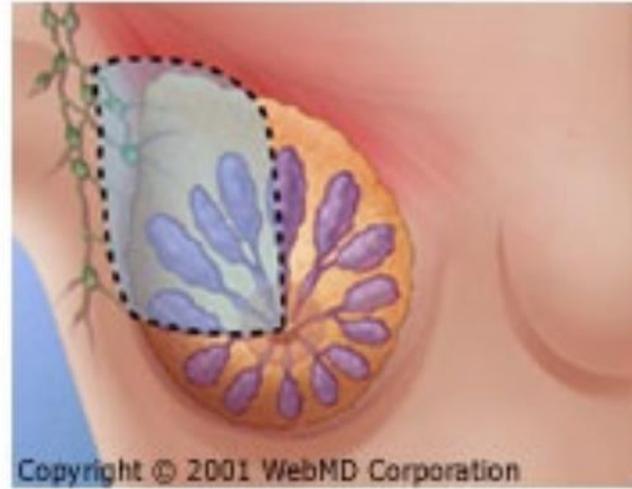

**muscolo
grande pettorale**

I livello
(lungo il margine laterale
del muscolo piccolo pettorale)

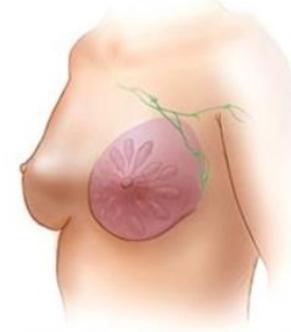

**il muscolo piccolo pettorale è stato sezionato all'altezza
dell'arteria ascellare e ribaltato in avanti e a sinistra**

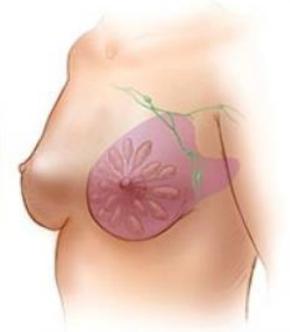

Quadrantectomy

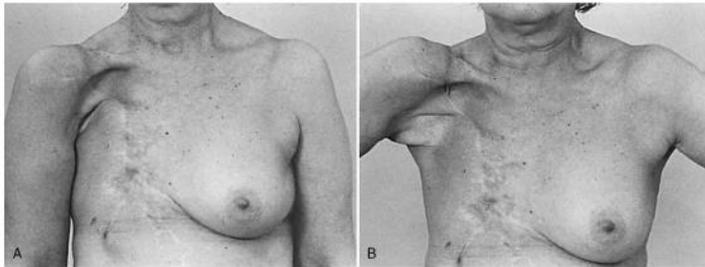

Simple mastectomy

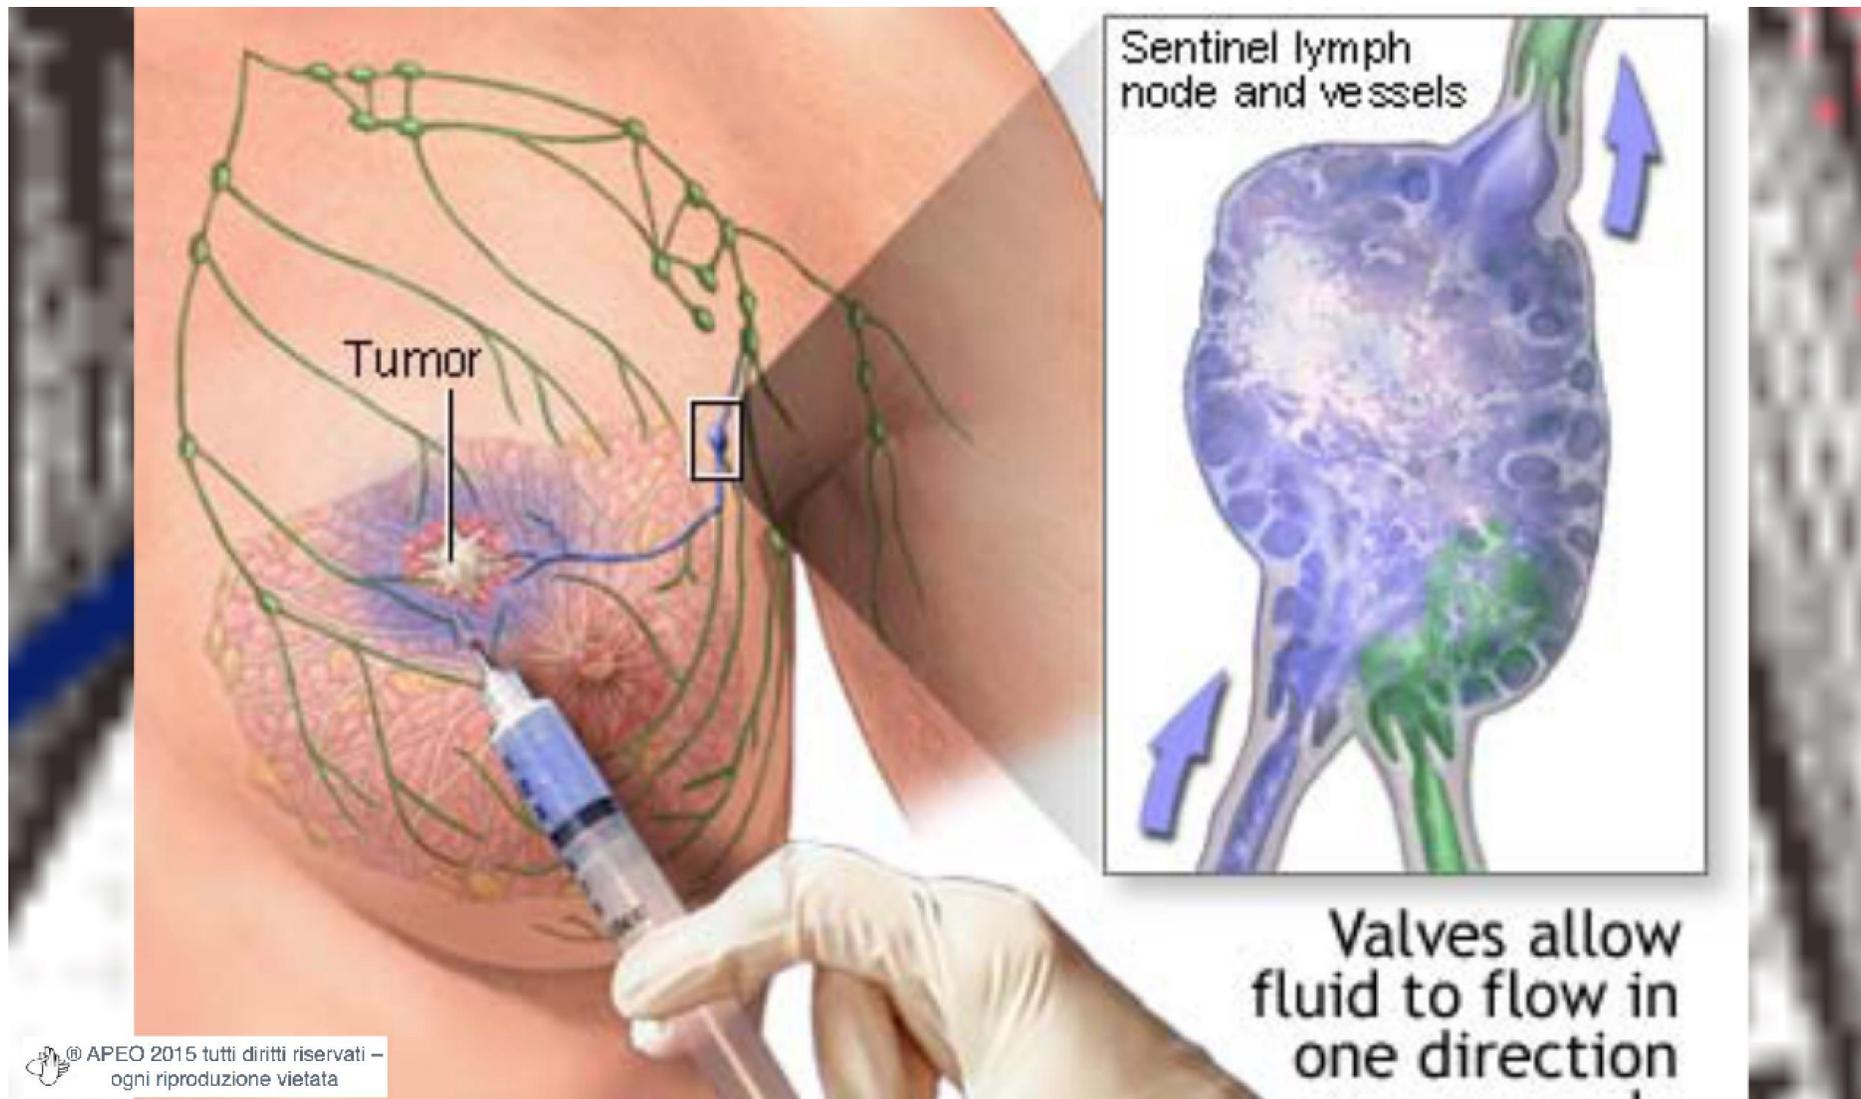

Modified radical mastectomy

© Mayo Foundation for Medical Education and Research. All rights reserved.

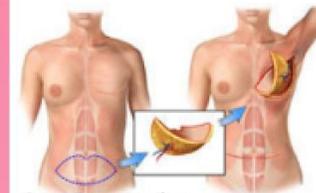

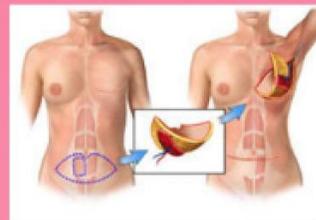

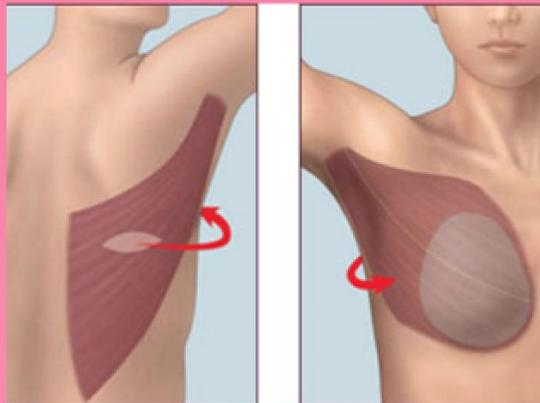

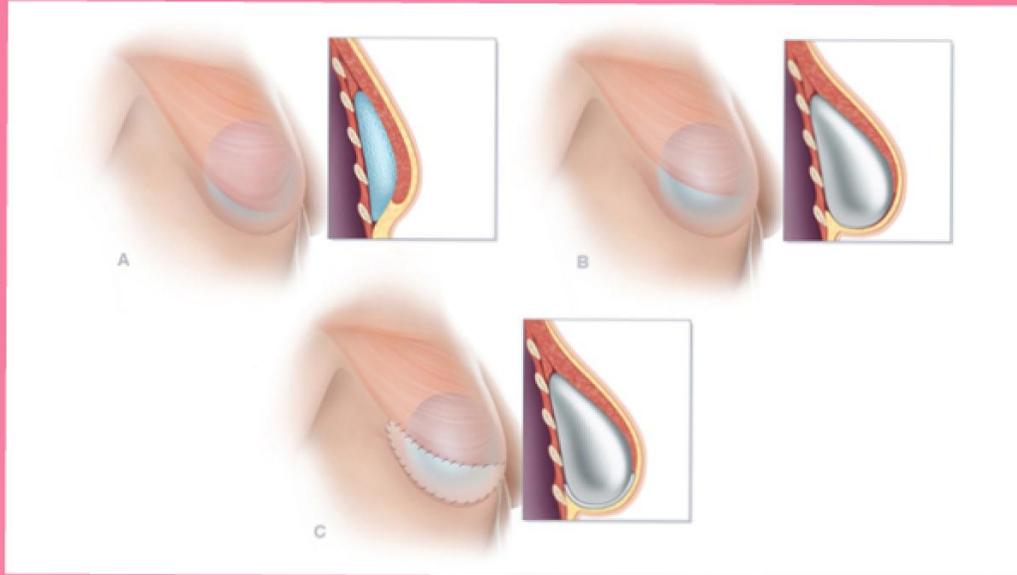

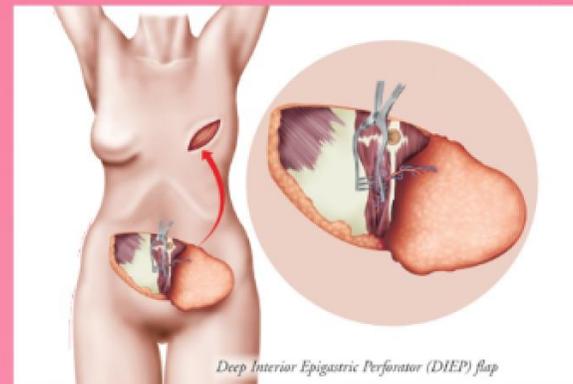

Tumor

Sentinel lymph node and vessels

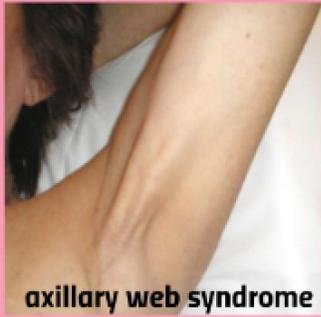

Valves allow fluid to flow in one direction

Breast Reconstruction:
Trans-Rectus Abdominus Flap Procedure
TRAM Flap

Deep Interior Epigastric Perforator (DIEP) flap

axillary web syndrome

Incidenza: 36% Dissezione ascellare
 BIs: 12%

Insorgenza: prime settimane post op

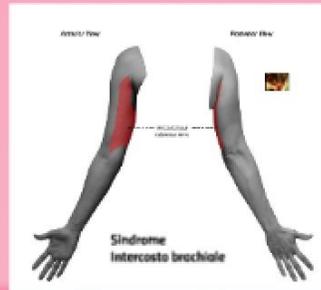

Sintomatologia: limitazione per dolore

Regressione: 3-6 mesi post op

ST-AWS

Scapola alata

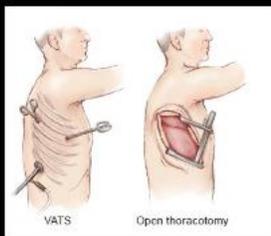

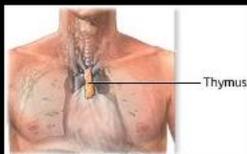

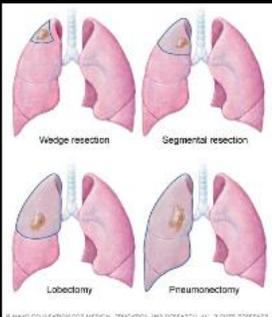

Gonfiore

Arrossamento

Necrosi

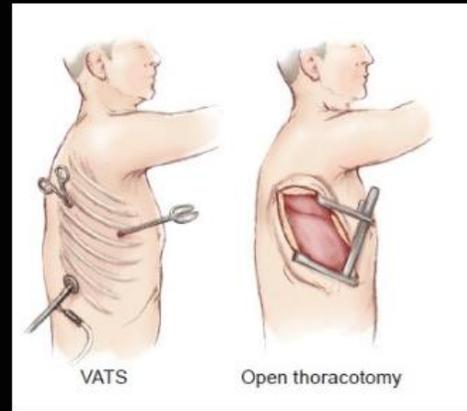

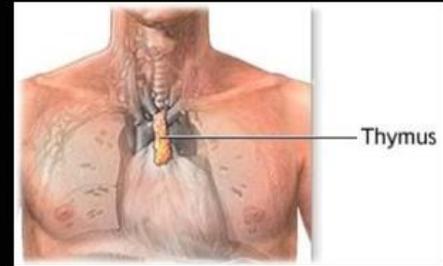

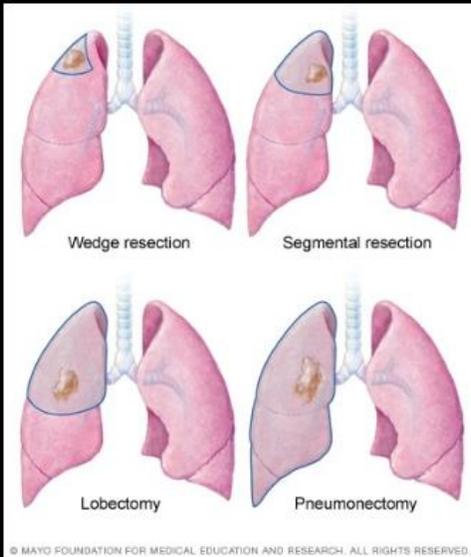

Problematiche respiratorie

Problemi articolari e muscolo fasciali

Scapola alata

Parestesie della parete toracica

Problematiche respiratorie

**Problemi articolari e
muscolo fasciali**

Scapola alata

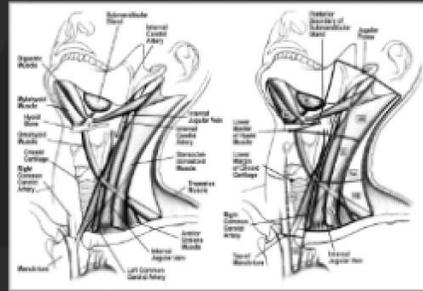

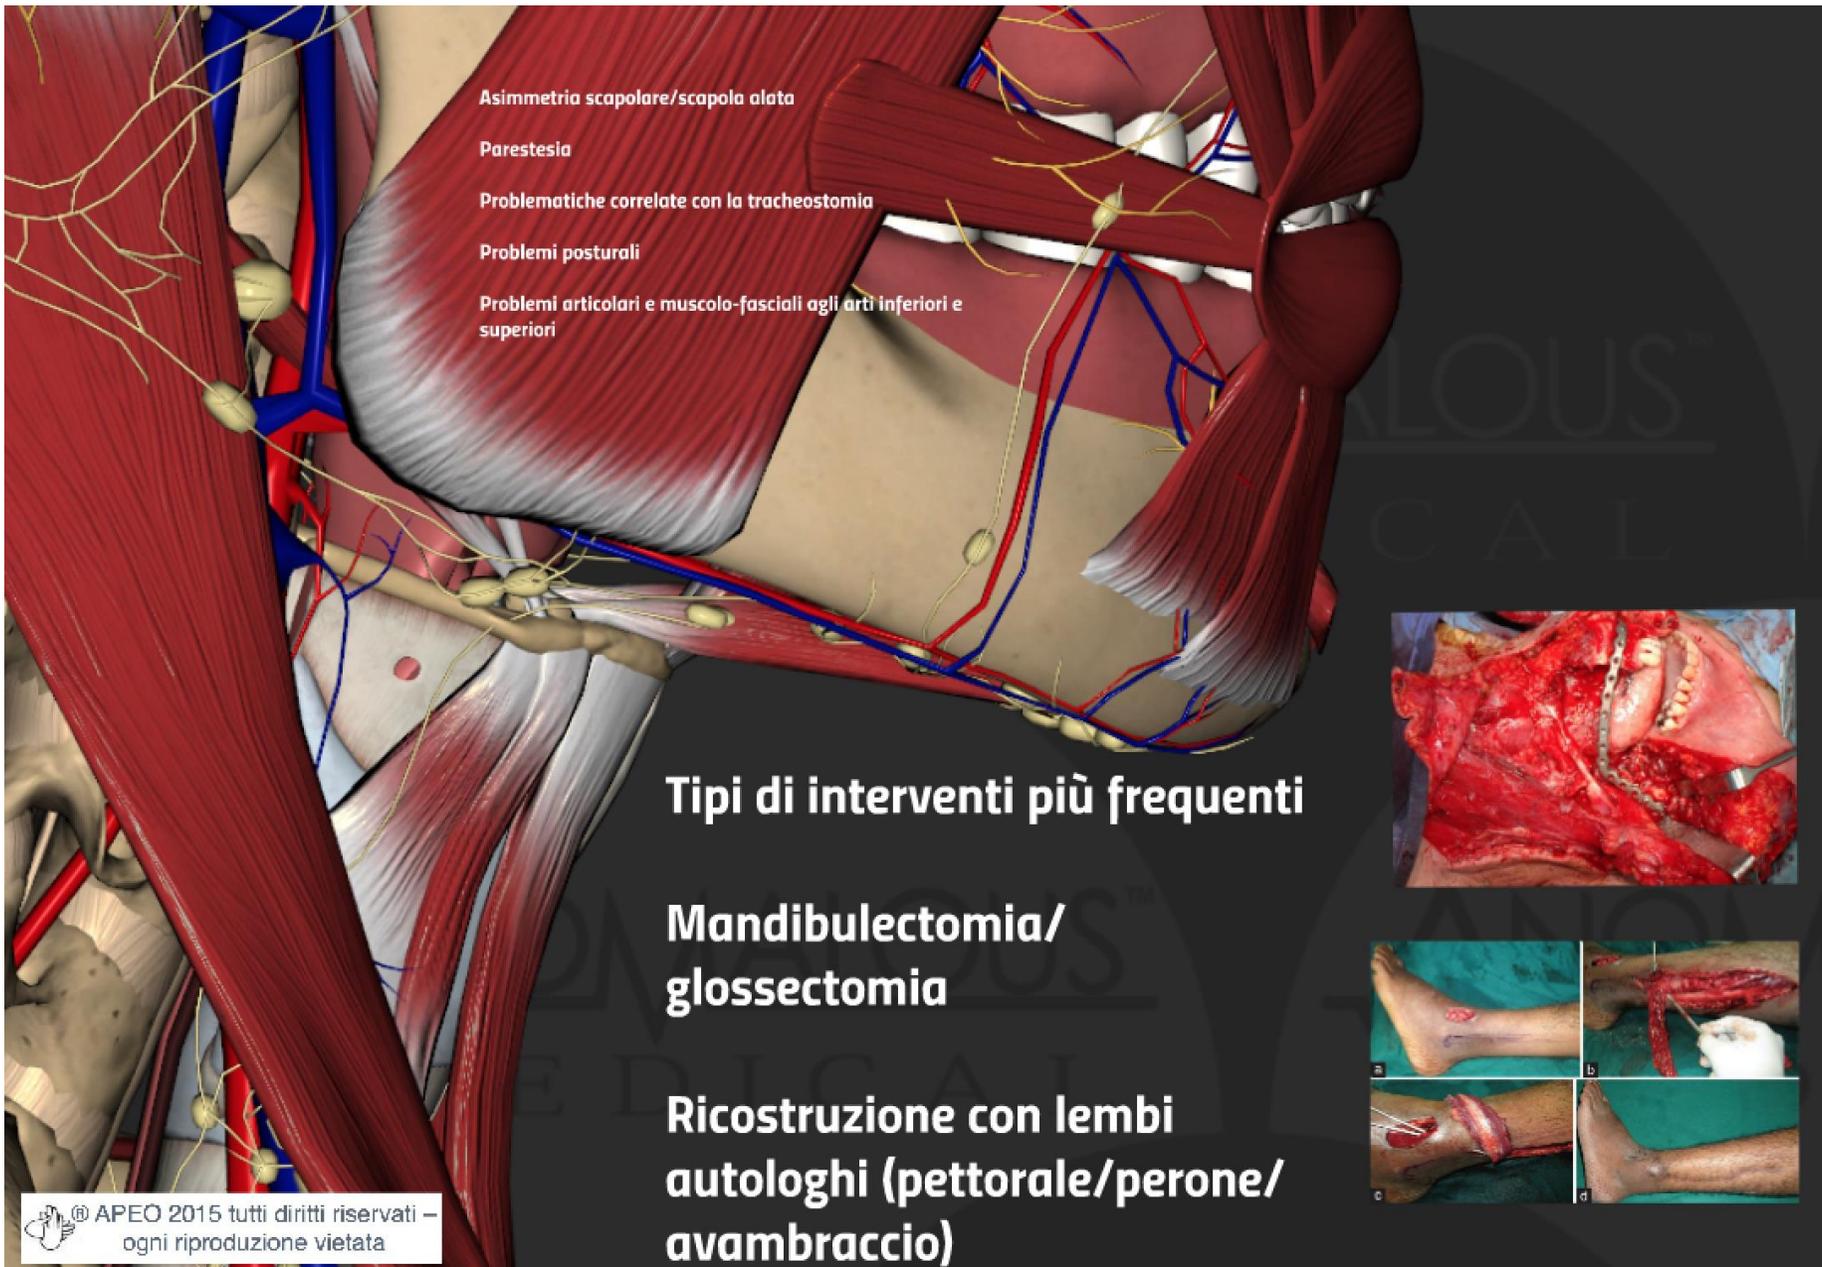

**Parestesie della parete
toracica**

Tipi di interventi più frequenti

Laringectomia

Svuotamento latero cervicale I-V
livello

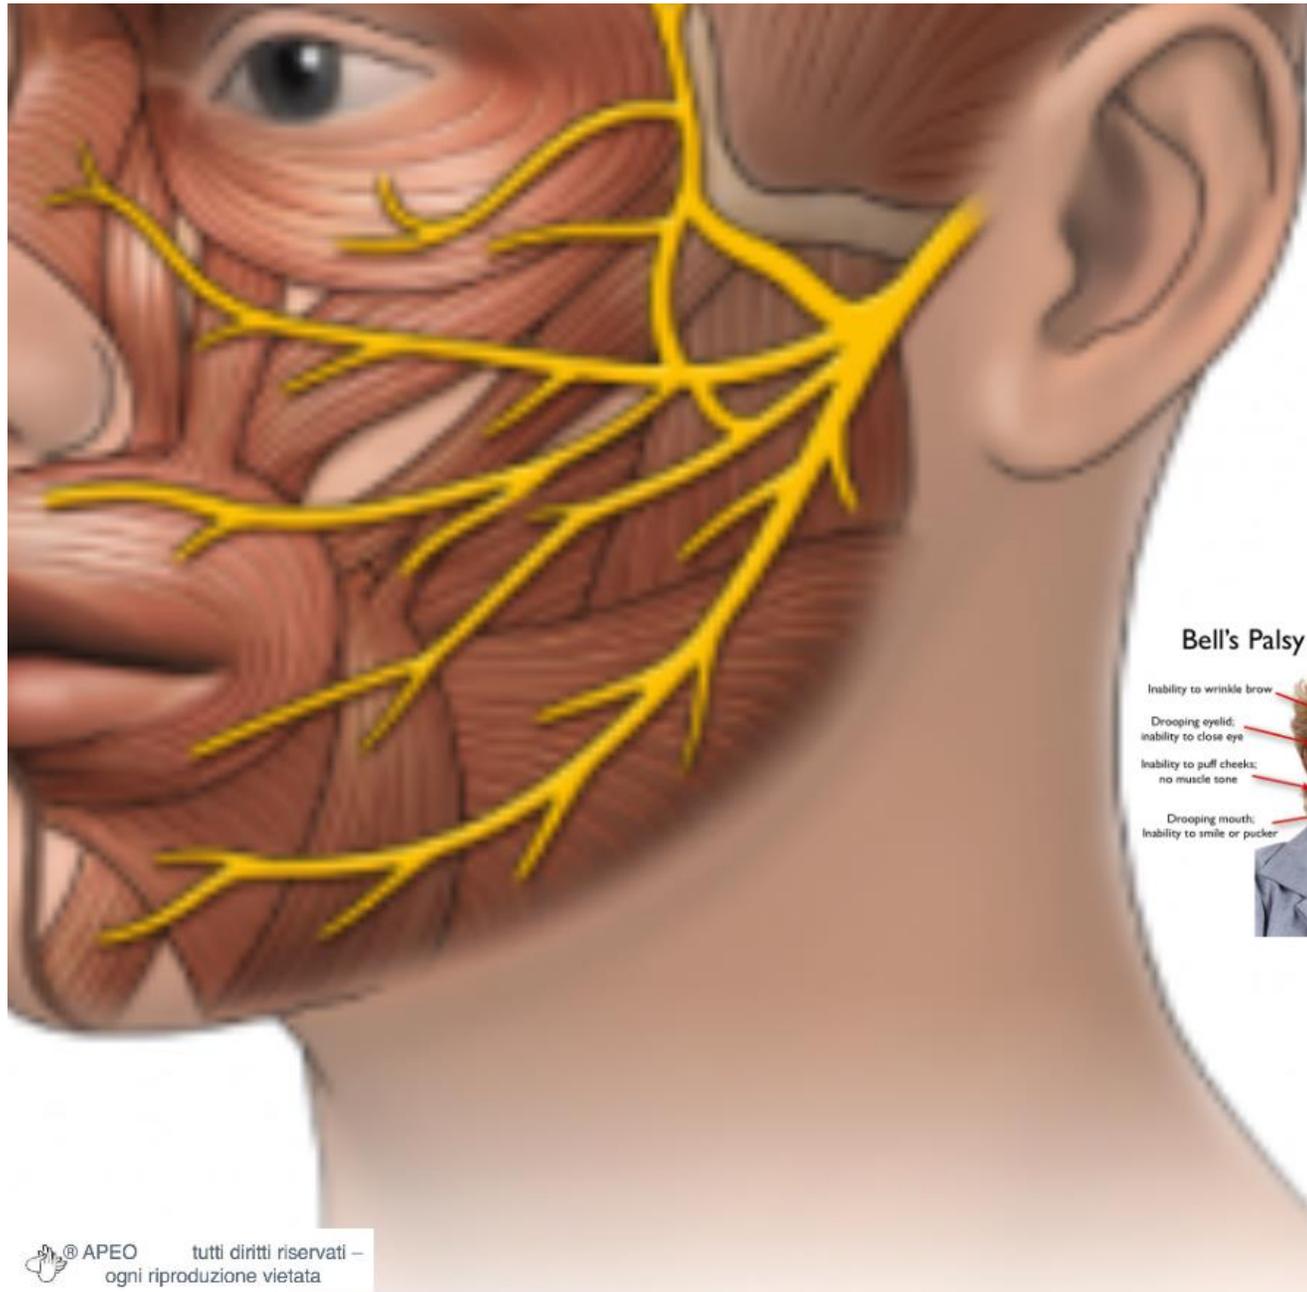

- Asimmetria scapolare/scapola alata
- Parestesia
- Problematiche correlate con la tracheostomia
- Problemi posturali
- Problemi articolari e muscolo-fasciali agli arti inferiori e superiori

Tipi di interventi più frequenti

Mandibulectomia/
glossectomia

Ricostruzione con lembi
autologhi (pettorale/perone/
avambraccio)

Bell's Palsy

Inability to wrinkle brow

Drooping eyelid:
inability to close eye

Inability to puff cheeks:
no muscle tone

Drooping mouth:
inability to smile or pucker

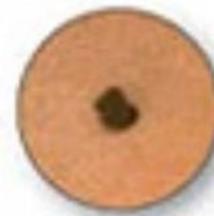

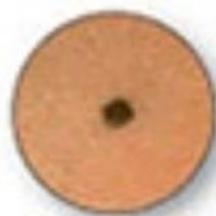

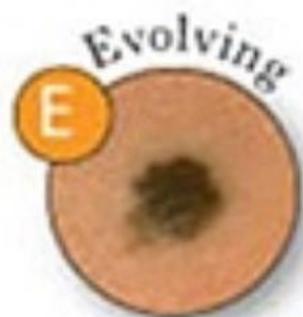

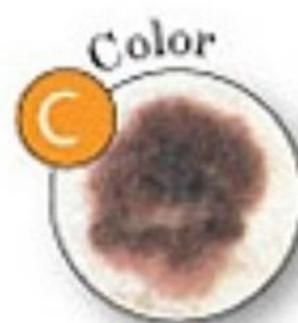

Sarcomi: tumori del tessuto connettivo

Melanoma: tumore maligno che origina dal melanocita

Detecting The ABCDEs Of Melanoma

SOURCE: THE AMERICAN ACADEMY OF DERMATOLOGY

Tipi di interventi più frequenti:

Svuotamenti linfonodali

Rimozione dei tessuti molli

Deficit del nervo otturatorio

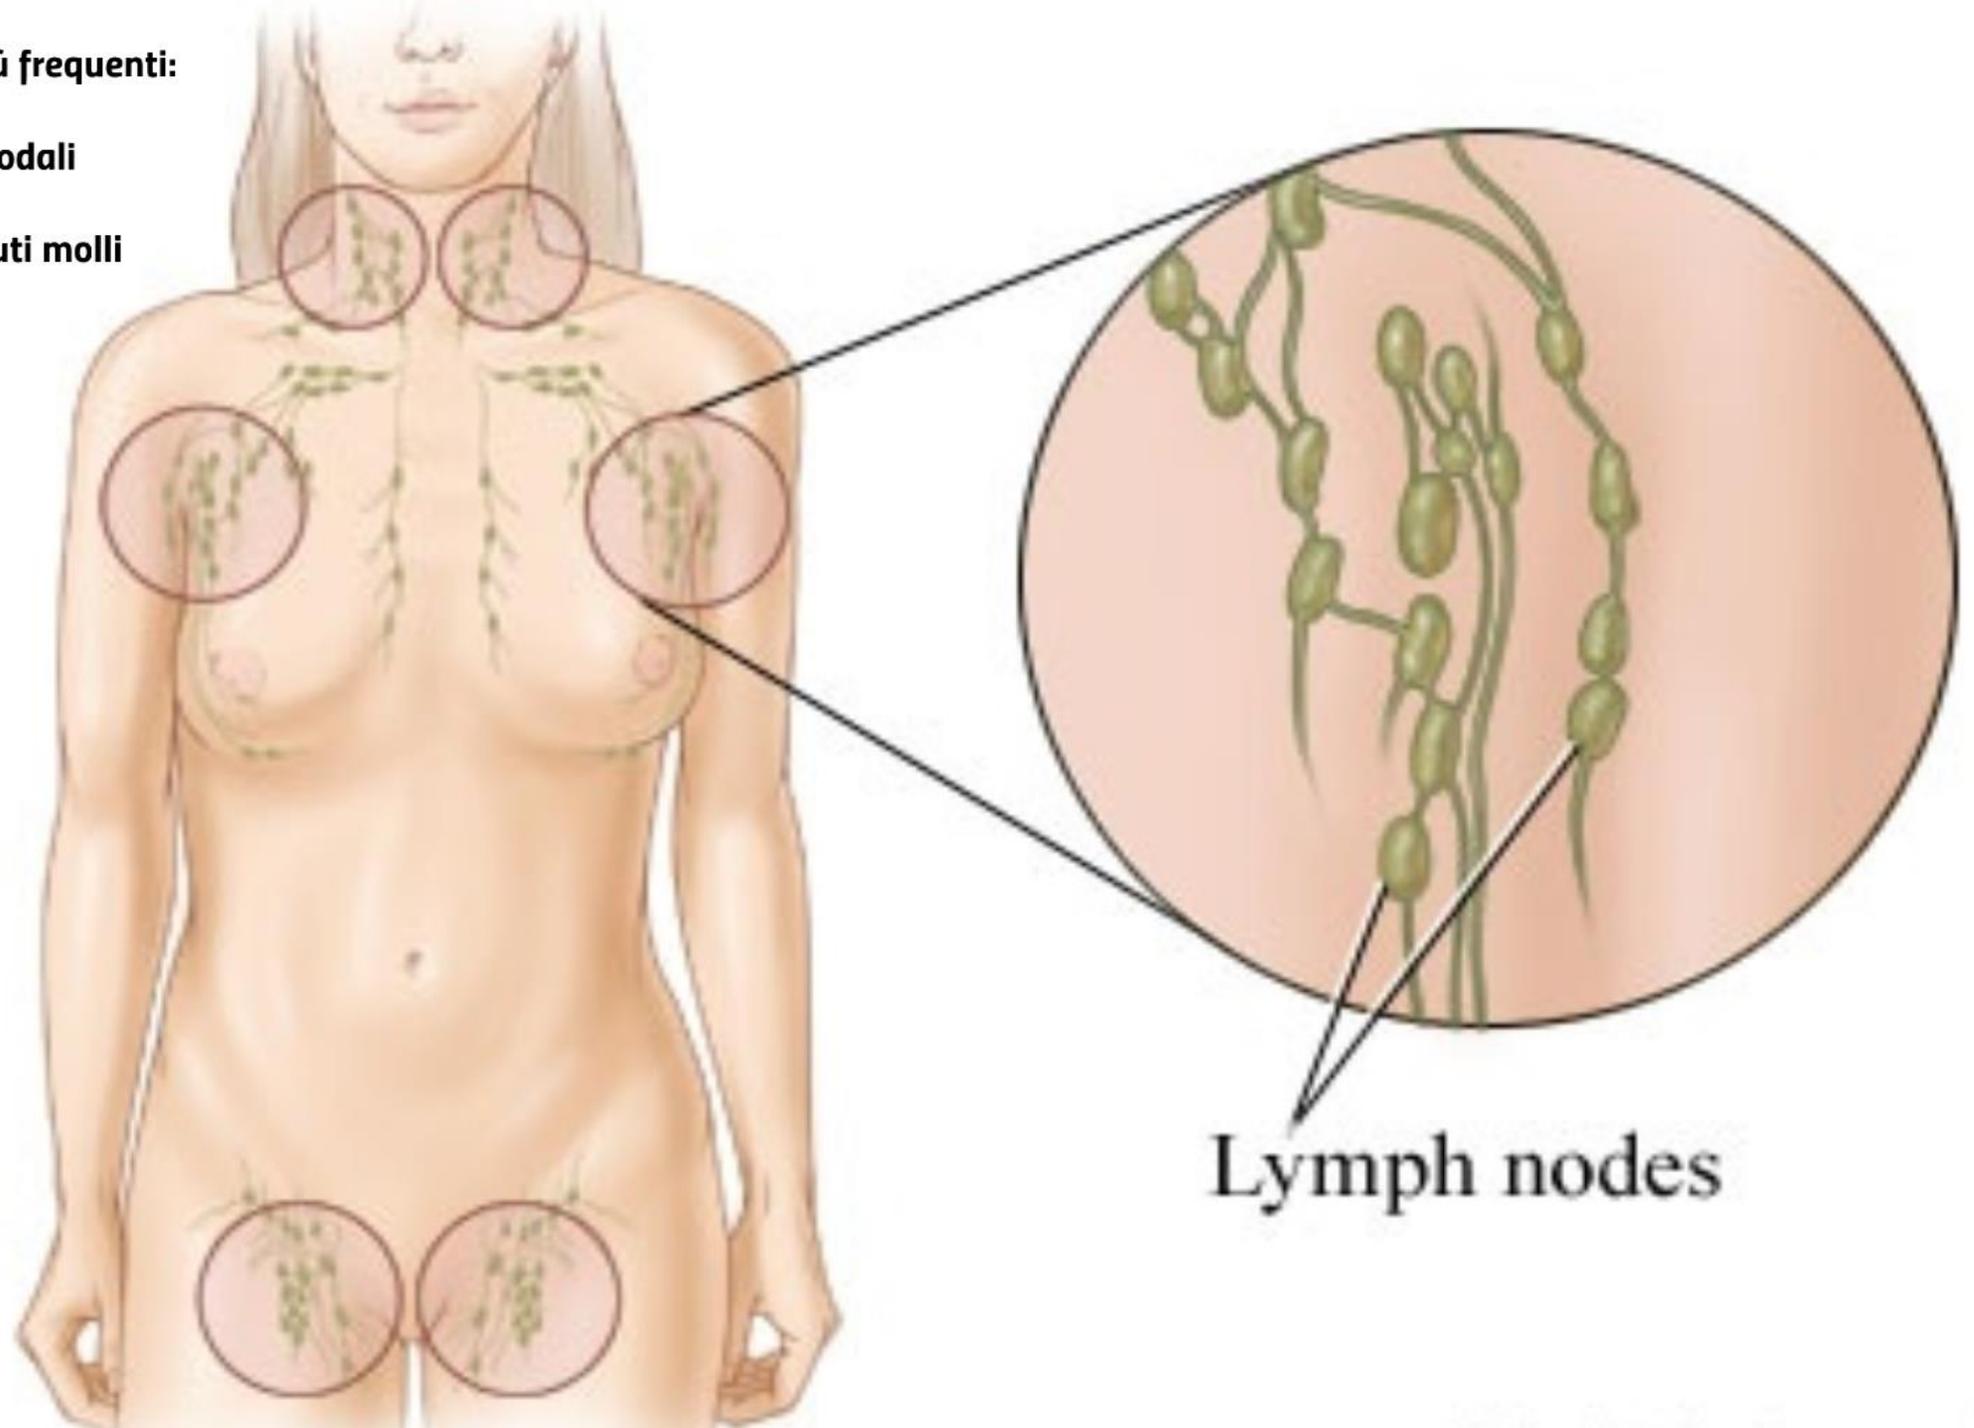

Deficit del nervo femorale

Deficit del nervo fibulare

Parestesie

Problemi posturali

Problemi articolari e muscolo-fasciali

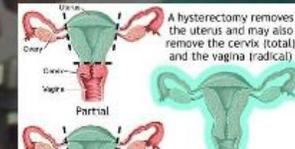

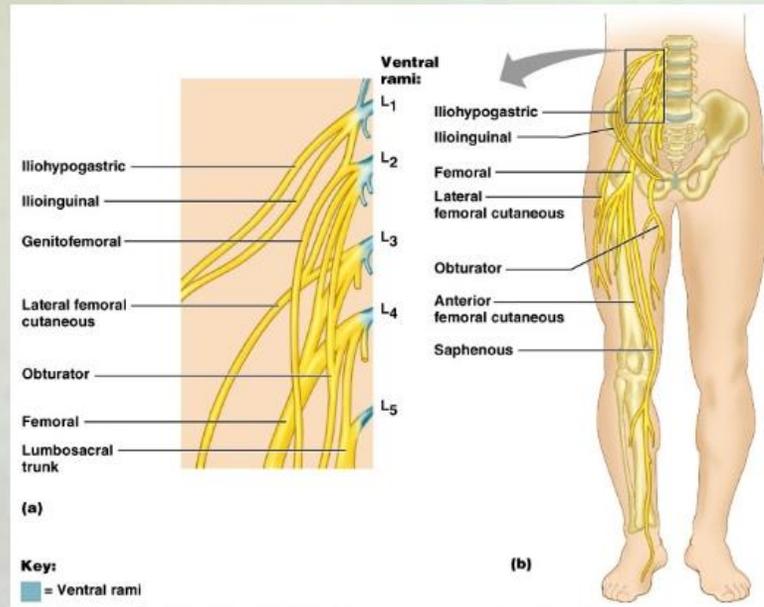

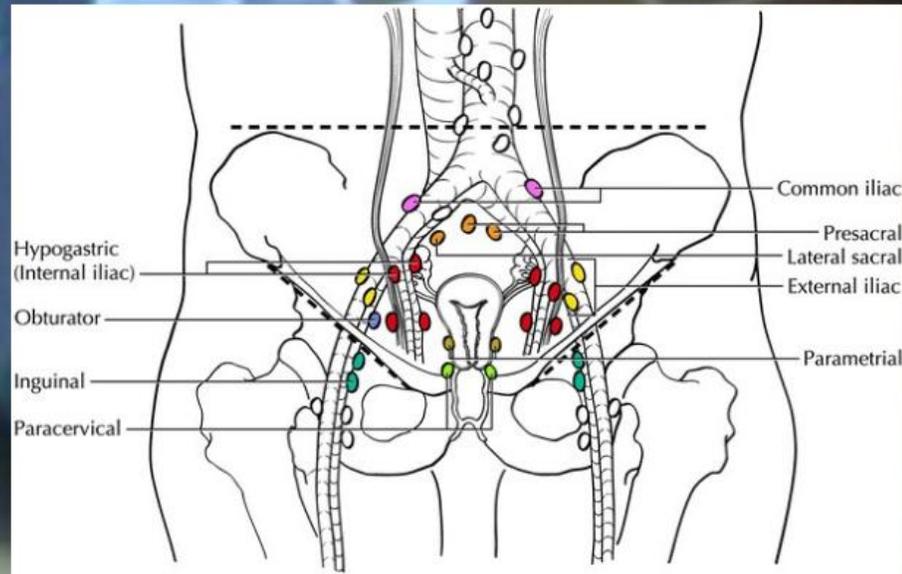

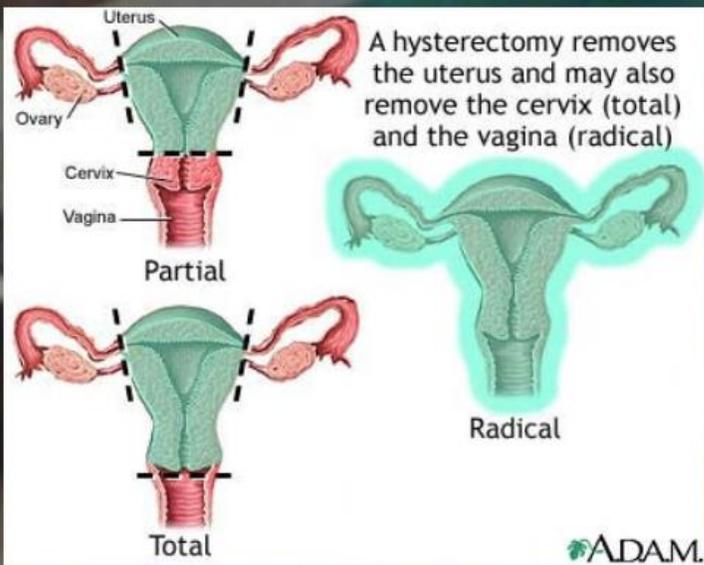

Lymph nodes

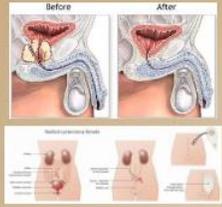

La Citoriduzione Primaria: asportazione di tutta la malattia macroscopicamente visibile.

La Citoriduzione Secondaria: Pazienti con recidiva

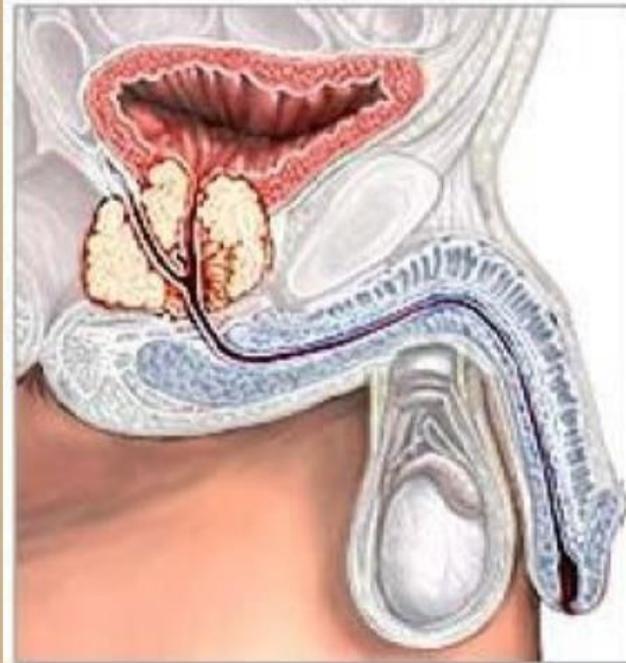

Eviscerazione: anteriore/posteriore

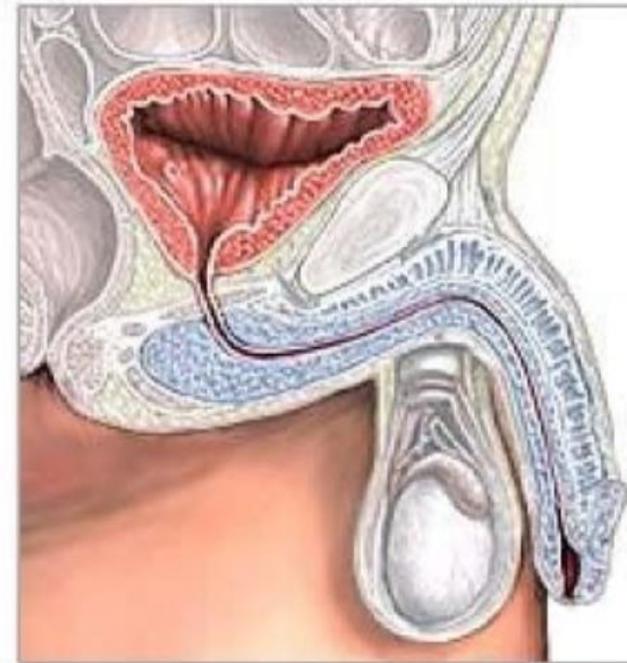

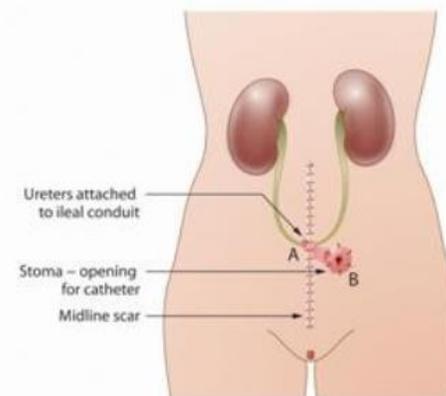

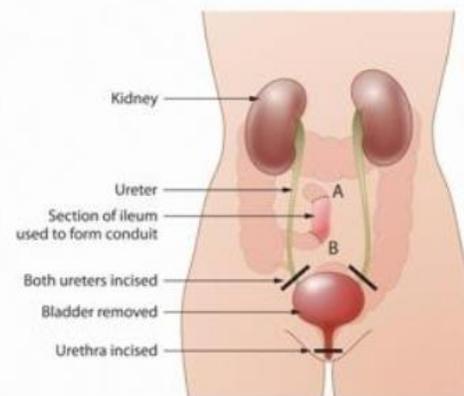

Before

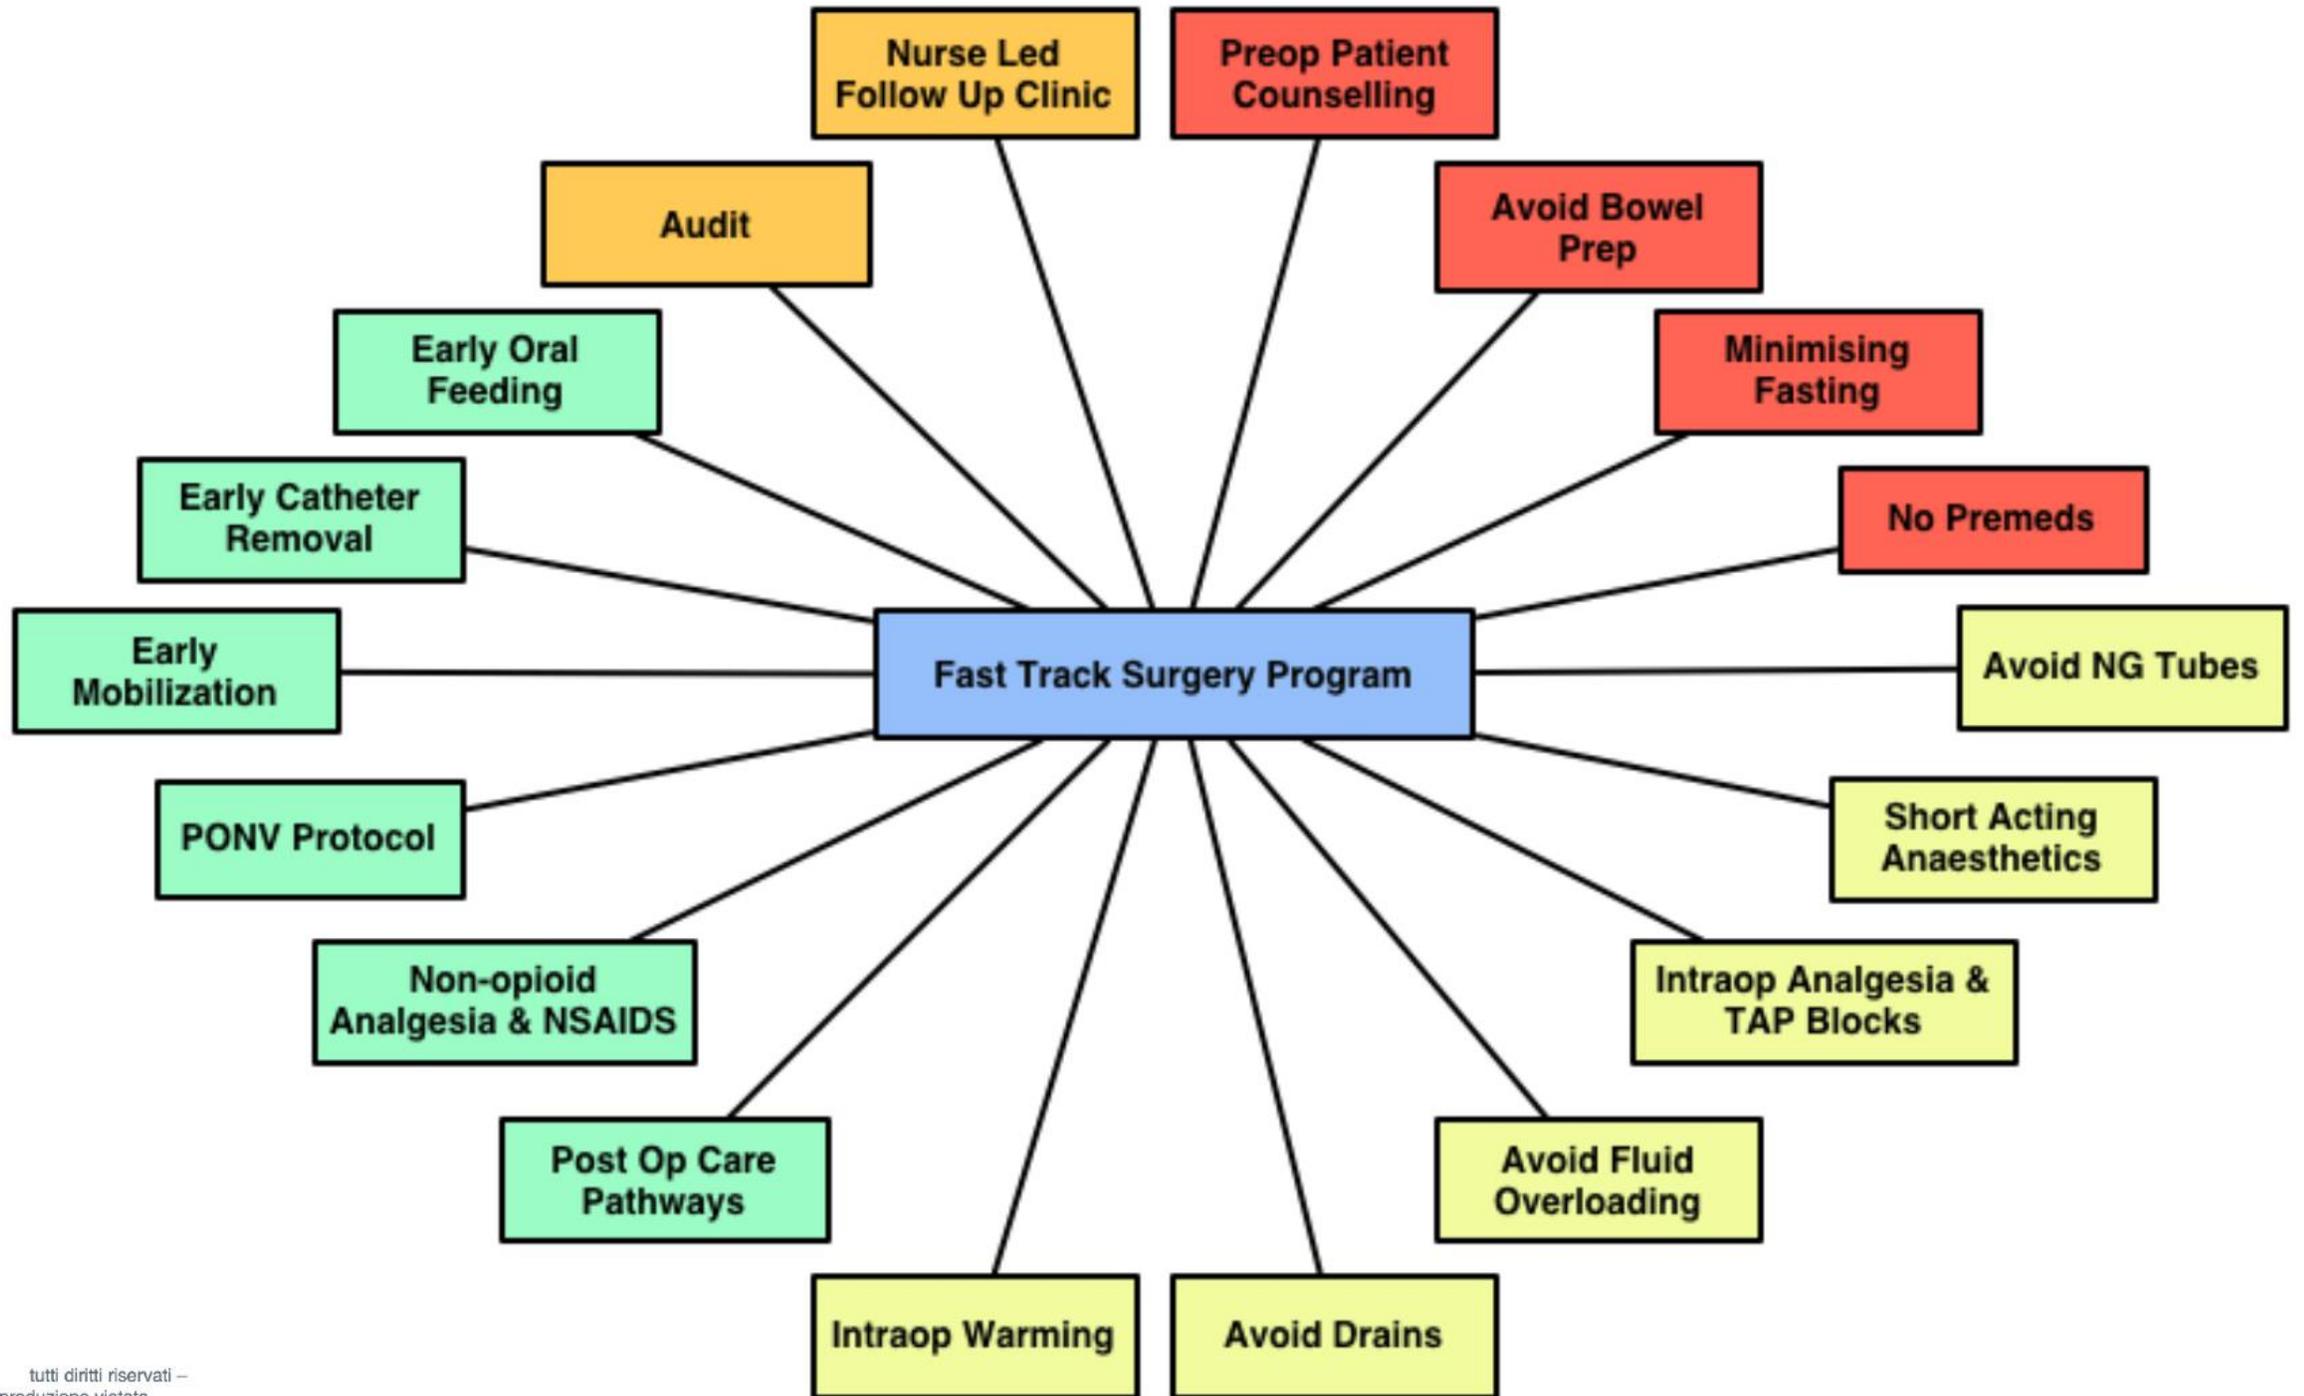

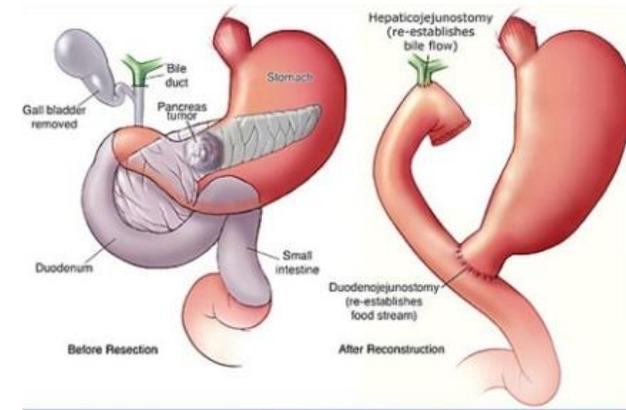

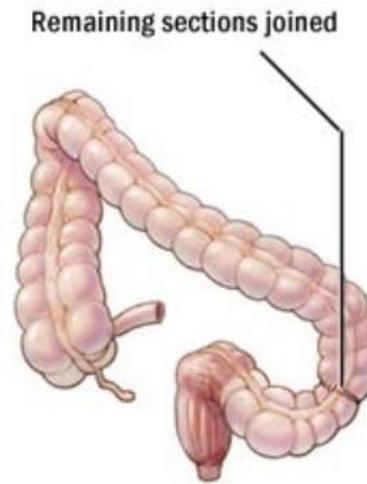

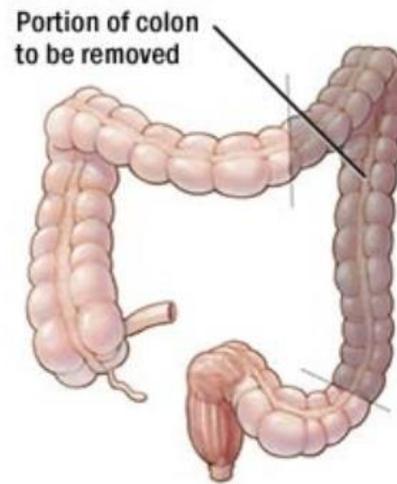

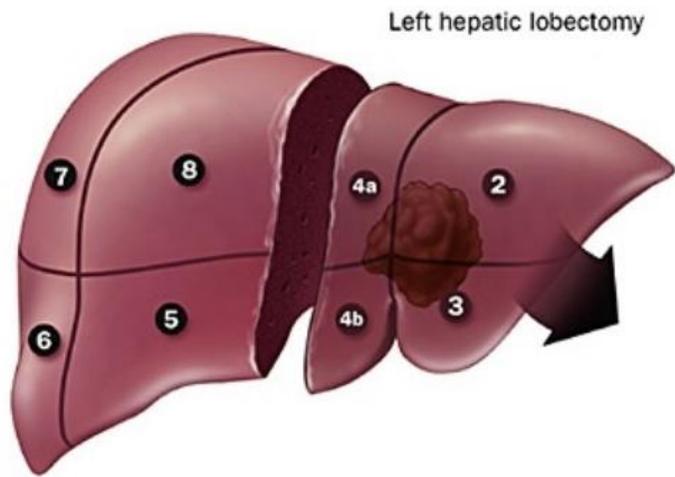

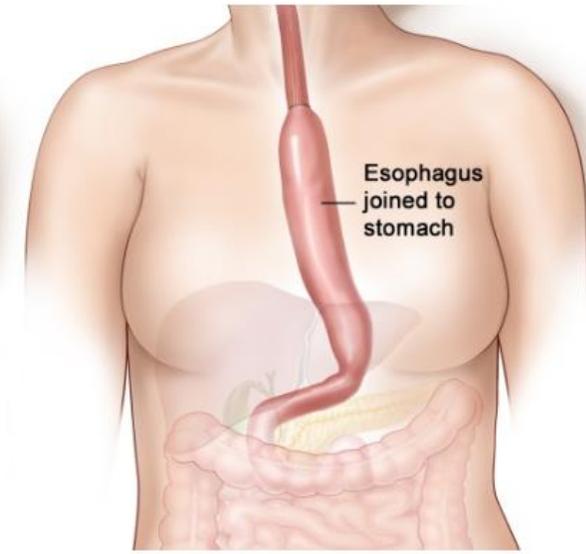

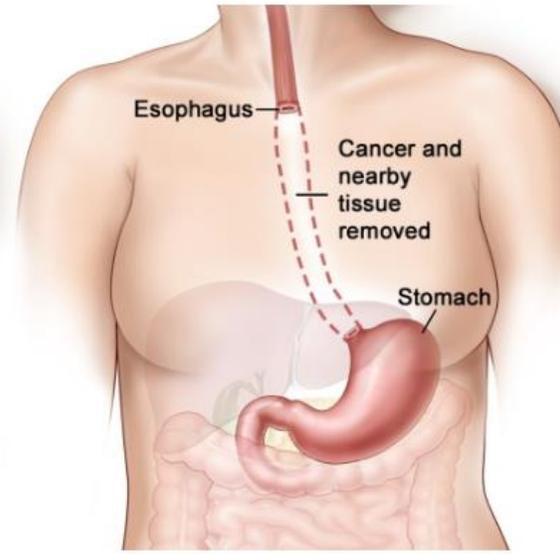

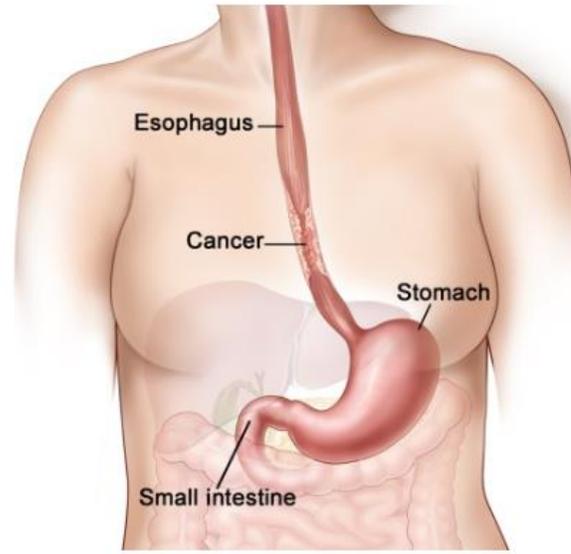

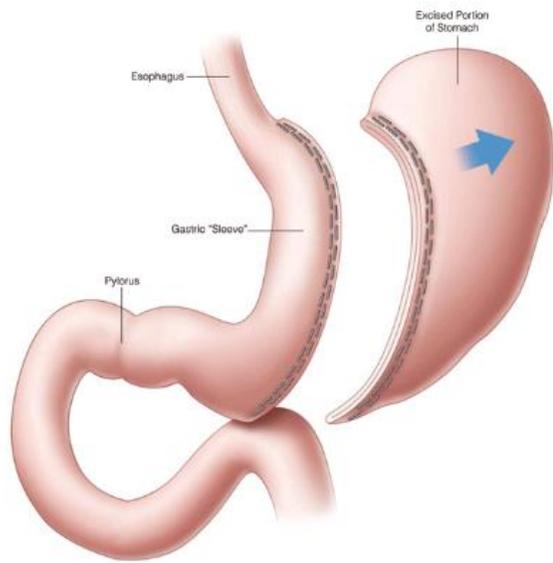

After

Radical cystectomy female

Sequela:

Deficit agli arti inferiori

Deficit della parete addominale

Parestesia

Problemi posturali

Problemi articolari e muscolo-fasciali

Incontinenza urinaria/fecale (stomia)

Oncologia medica

Parestesia neurotossica
Artralgia e mialgia
Vampate di calore
Alterazioni cutanee
Problemi associati
